

# **Surf House Weekly Vibration Monitoring Report**

**For Fort Partners**

**12/15/2025 to 12/22/2025**

# Project Narrative

## PROJECT INFORMATION

The project consists of the construction of a 12-level condominium structure. The new development will have a footprint of about 65 by 180 feet, and will rise to a maximum elevation of +140 feet NGVD. A single level basement is also planned for the development, with an anticipated finished floor elevation of -6' 8" feet NGVD. The underground parking garage will have approximate measurements of 206 feet in the east-west direction, and up to 65 feet in the north-south direction. The footprint of the garage structure is anticipated to be roughly 13,600 square feet. The garage will be accessed on the North side by car lifts. The eastern portion of the undeveloped land will include a pool and garden for the residents.

## REMOTE VIBRATION MONITORS

A total of thirteen (13) vibration monitors have been installed at this time. The units run continuously for a 24-hour period, with the exception of a short period of time to allow for the devices to download the data collected during the day. The location and identification of each device is presented in the table below and shown graphically on the map. A graph will be displayed for each monitor showing the data point collected during the specified time period. This report will display the historical data and data collected from the week of this report.

The vibration monitors were installed on the dates as listed in the table below:

| Installation Date | Location/Name of Vibration Monitor | Serial Number of Vibration Monitor |
|-------------------|------------------------------------|------------------------------------|
| 04/12/2023        | 8926 Collins VM                    | UM10647                            |
|                   | 8955 Collins VM1                   | UM6135                             |
|                   | 8955 Collins VM2                   | UM6842                             |
|                   | 8955 Collins VM3                   | UM12622                            |
|                   | 8955 Collins VM4                   | UM13655                            |
| 04/19/2023        | 9001 Collins VM1                   | UM9384                             |
|                   | 9001 Collins VM2                   | UM12058                            |
|                   | 9001 Collins VM3                   | UM12036                            |
|                   | 9008 Collins VM1                   | UM6881                             |
| 04/20/2023        | 9008 Collins VM2                   | UM13186                            |
|                   | 8966 Collins VM                    | UM13654                            |
|                   | 8925 Collins VM                    | UM12761                            |
| 11/17/2023        | 8925 Collins VM2                   | UM13483                            |
| 3/11/2024         | 9001 Collins VM3                   | UM13443                            |
| 9/18/2024         | 8955 Collins VM1                   | UM10191 (Swapped)                  |

|           |                  |                                             |
|-----------|------------------|---------------------------------------------|
| 9/18/2024 | 8955 Collins VM2 | UM12622 – renamed from VM3 to VM2           |
|           | 8955 Collins VM3 | UM13655 – renamed from VM4 to VM3           |
|           | 8955 Collins VM4 | UM6842 - relocated from VM2 and renamed VM4 |

## REVIEW OF VIBRATION MONITORING DATA

The following definitions identify the wording that will be used in the report to describe the vibration readings:

- Longitudinal: a vibration measurement in the axis in line with the vibration source (back and forth).
- Transverse: a vibration measurement in the axis perpendicular to the vibration source (side to side).
- Vertical: a vibration measurement in the vertical axis (up and down).
- Peak Particle Velocity (PPV): movement within the ground of molecular particles. This is not related to surface movement.

## THRESHOLD EXCEEDANCES

A vibration level threshold limit of 0.50 in/sec is being used for the project, with trigger alerts set at 0.30 in/sec, or 60 percent of the established threshold level. Listed below are the instances when the seismographs have exceeded the established threshold limit of 0.50 in/sec.:

| Date            | Vibration Monitor (VM) Name/Location | Peak Particle Velocity (in./sec.) |
|-----------------|--------------------------------------|-----------------------------------|
| 4/25/2023 8:50  | 9001 Collins VM3                     | 0.5229 <sup>1</sup>               |
| 4/25/2023 8:53  |                                      | 0.7891 <sup>1</sup>               |

Notes:

<sup>1</sup> Exceedances are a result of the enclosure for the vibration equipment being moved by a worker.

<sup>2</sup> Exceedance appears to be the result of some interior chipping activity or staging of equipment on the south façade of the building.

<sup>3</sup> Exceedance was caused by a physical test of the system performed by GEO-Instruments. Event was unrelated to any construction activity.

<sup>4</sup> Alert caused by neighboring property workers leaning against the VM system. None of the excavators were active at the time of the event.

<sup>5</sup> Exceedance was caused by lightning events in the close vicinity of the VM systems.

<sup>6</sup> Exceedance was caused by demolition of building slab.

<sup>7</sup> Exceedance was caused by demolition of building slab.

<sup>8</sup> Exceedance was caused by landscaping work being performed in the vicinity of the VM system. No other units showed exceedances at the time of this event.

<sup>9</sup> Exceedance occurred when no work was being performed on-site. This exceedance appears to be a result of pedestrian activity in the vicinity of the VM system.

<sup>10</sup> Exceedance was caused by work being performed at the garage entrance of 9001 Collins nearby the VM system.

<sup>11</sup> Exceedance due to demolition of concrete basement wall adjacent to the VM monitoring station.

<sup>12</sup> Exceedance due to demolition of concrete basement wall adjacent to the VM monitoring station.

<sup>13</sup> Exceedance due to demolition of concrete basement wall adjacent to the VM monitoring station.

<sup>14</sup> Exceedance due to demolition of concrete basement wall adjacent to the VM monitoring station.

<sup>15</sup> Exceedance due to demolition of concrete basement wall adjacent to the VM monitoring station.

<sup>16</sup> Exceedance was due to maintenance being performed on the monitoring system.

<sup>17</sup> Exceedance appears to be a result of lightning events in the close vicinity of the VM system. No work was taking place on-site at the time of this event.

<sup>18</sup> Exceedance was caused by vandalization of the cabinet and theft of the solar panel. The instrument cable was damaged during the process. A replacement VM system was installed on 3/11/2024. The solar panel also requires replacement.

<sup>19</sup> Exceedance was due to testing of replacement VM system.

<sup>20</sup> Exceedance was caused by a worker moving the VM cabinet.

<sup>21</sup> Exceedance was due to the VM system being bumped inadvertently during system maintenance.

<sup>22</sup> Exceedance appears to be due to the enclosure for the VM system being bumped by a worker.

<sup>23</sup> Exceedances appears to be due to the enclosure for the VM system being bumped by an outside worker.

<sup>24</sup> Exceedance occurred when no was taking place on-site. Exceedance due to workers for neighboring property bumping into the unit.

<sup>25</sup> Exceedance caused by contractors for the Mirage building dropping materials near the VM system. Exceedances was not related to work at the Surf House project site.

<sup>26</sup> Isolated, localized exceedances occurred in vibration monitor in close proximity of the construction activity. Other monitoring devices installed on 8955 Collins Avenue (total four monitoring stations) or devices on adjacent properties (total 9 devices installed on all neighboring properties) did not register vibration exceedances.

A protocol for this construction activity was established by Pistorino & Alam with help of Malcolm Drilling Company, Geo-Instruments, M2E, and NV5.

Engineer representatives of Geo-Instruments, Pistorino & Alam, and M2E were present on site during the entire activity and protocol was followed to stop construction activities at every exceedance and examine the surrounding buildings and site area before proceeding.

<sup>27</sup> Exceedance caused by excavator moving on-site nearby VM system.

<sup>28</sup> Exceedance occurred when no work activity was taking place. This event is not related to any work related to the construction project.

<sup>29</sup> Exceedance was from site logistics for moving equipment in close proximity to the VM system.

<sup>30</sup> Exceedance was due to soft sifting close to the monitor to change irrigation lines. No machinery or activity from construction was working at the time of this alert.

<sup>31</sup> Exceedance was due to an excavator moving very close to the monitor to prepare the surface for soil mixing rig.

<sup>32</sup> Exceedances occurred when no work was taking place on-site in the vicinity of the VM system. Exceedances appear to be related to other activities taking place off-site.

<sup>33</sup> Exceedance caused by outside pedestrian sitting on the VM cabinet. Vibration event was not related to the construction activity.

<sup>34</sup> Exceedance resulted from trash truck pickup at the loading dock of the adjacent property. Event was not related to construction activity on-site.

<sup>35</sup> Exceedance was due to the VM system being bumped inadvertently during system maintenance.

<sup>36</sup> Exceedances were due to the rig on-site working in close proximity to the VM sensor. Work was stopped and instance was investigated. Adjacent monitors were checked, no vibrations were registered. No significant vibrations were observed on site by personnel. The rig was stationed in very close proximity of the sensor, in a distance less than two feet away which caused the alert.

<sup>37</sup> Exceedance was due to the unit being vandalized. System was found on 12/10/2024 to be toppled over with the cables to cut. The system was inspected by GEO-Instruments on 12/12/2024 and confirmed that any readings from the unit following this event were not valid. A replacement system is scheduled for installation early this week.

<sup>38</sup> Exceedances were due to the rig on-site working in close proximity to the VM sensor. Work was stopped and instances were investigated. Adjacent monitors were checked, no vibrations were registered. No significant vibrations were observed on site by personnel. The rig was stationed in very close proximity of the sensor, in a distance less than two feet away which caused the alert.

<sup>39</sup> Exceedances occurred during maintenance of the VM system. This event was not related to the construction activities.

<sup>40</sup> Exceedances were due to system testing following system re-installation. These events were not related to the construction activities on-site.

<sup>41</sup> Exceedances were caused by equipment moving in close proximity to the VM system.

<sup>42</sup> Exceedances were due to maintenance for testing of the communication for the VM system. These events were not related to the construction activities on-site.

<sup>43</sup> Exceedances were caused by materials being unloaded in close proximity to the VM system.

<sup>44</sup> The system was inspected following the alert. No vibration related work activities were taking place on-site at the time of the alarm. This exceedance appears to be related to activities off-site unrelated to the construction project.

<sup>45</sup> The system was inspected following the alert. No work activity was taking place on-site at the time of the event. This exceedance appears to be unrelated to the construction project.

<sup>46</sup> Exceedances on these dates were due to electricians performing maintenance work at the adjacent property. These systems were disturbed as part of the maintenance work. The systems were re-installed the afternoon of 1/16/2025, while some work continued the following day.

<sup>47</sup> Exceedances occurred when DSM mixing was operating within feet of the VM system. An existing pile was hit which caused isolated vibration exceedances.

<sup>48</sup> No work was taking place on-site at the time of the event. This exceedance appears to be caused by cleaning crews working near the VM systems.

<sup>49</sup> Exceedances were localized and isolated due to rig working in very close proximity (less than 3ft away) from the VM sensor.

<sup>50</sup> Exceedances occurred when there was a trash pickup at the property next door. These do not appear to be related to any of the construction activities.

<sup>51</sup> Exceedance occurred when FPL was performing work nearby the system and bumped the instrument.

<sup>52</sup> Exceedance occurred due to the VM enclosure being relocated for placement of trailers and equipment in the lot. The geophone cable was ripped out of the geophone by the contractor when the cabinet was moved. The geophone was replaced on 4/8/2025.

<sup>53</sup> Exceedances occurred during maintenance of the VM system. This event was not related to the construction activities.

<sup>54</sup> Exceedance occurred as part of testing for the replacement system installed on this date. This event is not related to construction activities.

<sup>55</sup> Exceedance appears to be related to a trash pickup at the property next door. This does not appear to be related to any of the construction activities.

<sup>56</sup> Exceedance appears to be related to activities at the property next door, or pedestrians off site near the unit. This does not appear to be related to any of the construction activities.

<sup>57</sup> Exceedance appears to be related to a trash pickup at the property next door. This does not appear to be related to any of the construction activities.

<sup>58</sup> Exceedance occurred while performing maintenance on the VM system. This event is not related to construction activities.

- <sup>59</sup> Exceedances occurred when a moving company was performing work nearby the system. These events do not appear to be related to the adjacent construction activities.
- <sup>60</sup> Exceedances were due to workers on the Arte building bumping the VM system with their tool boxes and materials. These events do not appear to be related to the adjacent construction activities.
- <sup>61</sup> Exceedance was due to workers on the Arte building bumping the VM system with their tool boxes and materials. These events do not appear to be related to the adjacent construction activities.
- <sup>62</sup> Exceedances were due to workers on the Arte building working nearby VM system. These events do not appear to be related to the adjacent construction activities.
- <sup>63</sup> Exceedances on these dates appears to be a result of work activities taking place at the Arte building near the VM systems. These events do not appear to be related to the adjacent construction activities.
- <sup>64</sup> Exceedance appears to be related to a trash pickup at the property next door. This does not appear to be related to any of the construction activities.
- <sup>65</sup> Exceedance appears to be related to landscapers performing work on the adjacent property. This does not appear to be related to any of the construction activities.
- <sup>66</sup> Exceedance occurred while performing maintenance on the VM system. This event is not related to construction activities.
- <sup>67</sup> Exceedance occurred during maintenance of the VM system and is not related to the construction activity.
- <sup>68</sup> Exceedance appears to be related to landscapers performing work on the adjacent property. This does not appear to be related to any of the construction activities.
- <sup>69</sup> Exceedance occurred during maintenance of the VM system and is not related to the construction activity.
- <sup>70</sup> Exceedance occurred after site working hours and is not related to construction activities.
- <sup>71</sup> Exceedance occurred after site working hours and is not related to construction activities.
- <sup>72</sup> Exceedance occurred after site working hours and is not related to construction activities.
- <sup>73</sup> Exceedance appears to be related to activities at the adjacent property and not from construction work.
- <sup>74</sup> Exceedance occurred after site working hours and is not related to construction activities.
- <sup>75</sup> Exceedance occurred after site working hours and is not related to construction activities.
- <sup>76</sup> Exceedance occurred during maintenance of the VM system and is not related to the construction activity.
- <sup>77</sup> Exceedance occurred during non-working hours and is not related to construction activities.
- <sup>78</sup> Exceedance occurred during non-working hours and is not related to construction activities.
- <sup>79</sup> Exceedance appears to be related to activities at the adjacent property and not from construction work. No other exceedances occurred at this system following this event.

#### DATES WHEN VIBRATION DATA WAS NOT RECORDED

Below is a table of dates when readings were not recorded on the vibration monitor, along with the cause of the reason for each occurrence.

| Date                              | Vibration Monitor (VM) Name/Location |
|-----------------------------------|--------------------------------------|
| 4/12/2023 17:00 – 4/19/2023 18:00 | 8955 Collins VM2 <sup>1</sup>        |
| 4/22/2023 6:00 – 4/28/2023 10:00  | 8955 Collins VM3 <sup>2</sup>        |

|                                                                                                                                          |                                |
|------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| 5/3/2023 2:30 – 5/5/2023 12:30                                                                                                           | 8926 Collins VM <sup>3</sup>   |
| 5/23/2023 1:15 – 5/31/2023 11:42                                                                                                         | 8926 Collins VM <sup>4</sup>   |
| 5/30/2023 19:00 – 6/2/2023 13:49                                                                                                         | 9001 Collins VM1 <sup>5</sup>  |
| 6/30/2023 11:05 – 7/3/2023 12:25                                                                                                         | 8955 Collins VM3 <sup>6</sup>  |
| 9/21/2023 16:16 – 9/22/23 8:56                                                                                                           | 9001 Collins VM3 <sup>7</sup>  |
| 10/25/2023 16:20 – 10/26/2023 7:28                                                                                                       | 8955 Collins VM1 <sup>8</sup>  |

Notes:

<sup>1</sup> During the setup of this system, the modem was not allowing connection to the system. Due to the communication issue, the unit was not activated. The modem was replaced on 4/19/2023 to allow communication and the unit was activated at that time.

<sup>2</sup> Communication to this system was interrupted on 4/17/2023. The communications were re-established on 4/28/2023 and all data was processed. Unit lost power on 4/22/2023 and was restarted on 4/28/2023 during the testing of the system.

<sup>3</sup> Battery power of system was expended and required replacement, completed on 5/5/2023.

<sup>4</sup> Battery power of system was expended and requires battery replacement. Battery replaced on 6/2/2023.

<sup>5</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 6/2/2023.

<sup>6</sup> A site visit was made on 7/3/2023 to resolve the communication issue with this system. At this time the battery was also swapped out due to low power. The system was restarted, and all data was recovered from the past week.

<sup>7</sup> Unit was turned off while doing maintenance and was inadvertently left off following maintenance. This was noted the following morning, and the unit was returned to normal operation.

<sup>8</sup> Unit was turned off while doing maintenance and was inadvertently left off. This was noted the following morning, and the unit was returned to normal operation.

<sup>9</sup> Unit was found to have stopped monitoring during the day on 11/2/2023. This was discovered the morning of 11/3/2023 and the unit was returned to normal operation following review of the system setup.

<sup>10</sup> Maintenance was performed on the system on 11/2/2023 to change batteries. Following the battery change it was found that the modem would not turn on. A replacement modem was installed on 11/3/2023 which allowed communications to the system, but the monitoring unit was not passing sensor checks. The issue appears to be a result of a short that occurred in the unit. A replacement VM system was installed on 11/7/2023.

<sup>11</sup> Battery power of system was expended and requires battery replacement. Battery was replaced on 1/2/2024.

<sup>12</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 1/11/2024.

<sup>13</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 1/29/2024.

<sup>14</sup> System stopped monitoring on 4/5/2024 and required a manual restart. The unit was returned to normal operation on 4/8/2024.

<sup>15</sup> System was showing breaks in readings due to low power on batteries. Batteries were replaced on 5/6/2024.

<sup>16</sup> Monitoring for the system was stopped remotely for data transfer, but communication was lost following the transfer. The system was restarted once communication was re-established.

<sup>17</sup> System did not return to typical operation following a data transfer. System was restarted once the issue was noted.

<sup>18</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 5/23/2024.

<sup>19</sup> Battery power of system is expended and required battery replacement. Battery was replaced on 6/6/2024 and all data from the system has been recovered and is included in this report.

<sup>20</sup> Monitoring for the system was stopped remotely for data transfer, but communication was lost following the transfer. The system was restarted once communication was re-established.

<sup>21</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 7/30/2024.

<sup>22</sup> Battery power of the system was expended and required replacement. Battery was replaced on 9/17/2024 and VM system was swapped due to the internal lithium battery no longer working.

<sup>23</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 12/3/2024.

<sup>24</sup> System was vandalized on 12/9/2024. A replacement system is scheduled for installation the week of 12/16/2024.

<sup>25</sup> VM system was removed from the site in error. A replacement system is scheduled for installation the week of 12/23/2024.

<sup>26</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 04/02/2025.

<sup>27</sup> VM system was disconnected from the external battery by others on 4/4/25. The internal battery was depleted on 4/7/25 prior to the battery being reconnected on 4/8/25.

<sup>28</sup> VM systems external battery appears to have become disconnected from the system. A site visit was made to address this issue, but resulted in lost readings due to the depleted internal battery

<sup>29</sup> VM system was temporarily turned off due to outside activities causing vibration events unrelated to construction. System was returned to normal operation following the unit relocation on 5/27/2025.

<sup>30</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 06/05/2025.

<sup>31</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 06/05/2025.

<sup>32</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 06/24/2025.

<sup>33</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 08/6/2025.

<sup>34</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 08/13/2025.

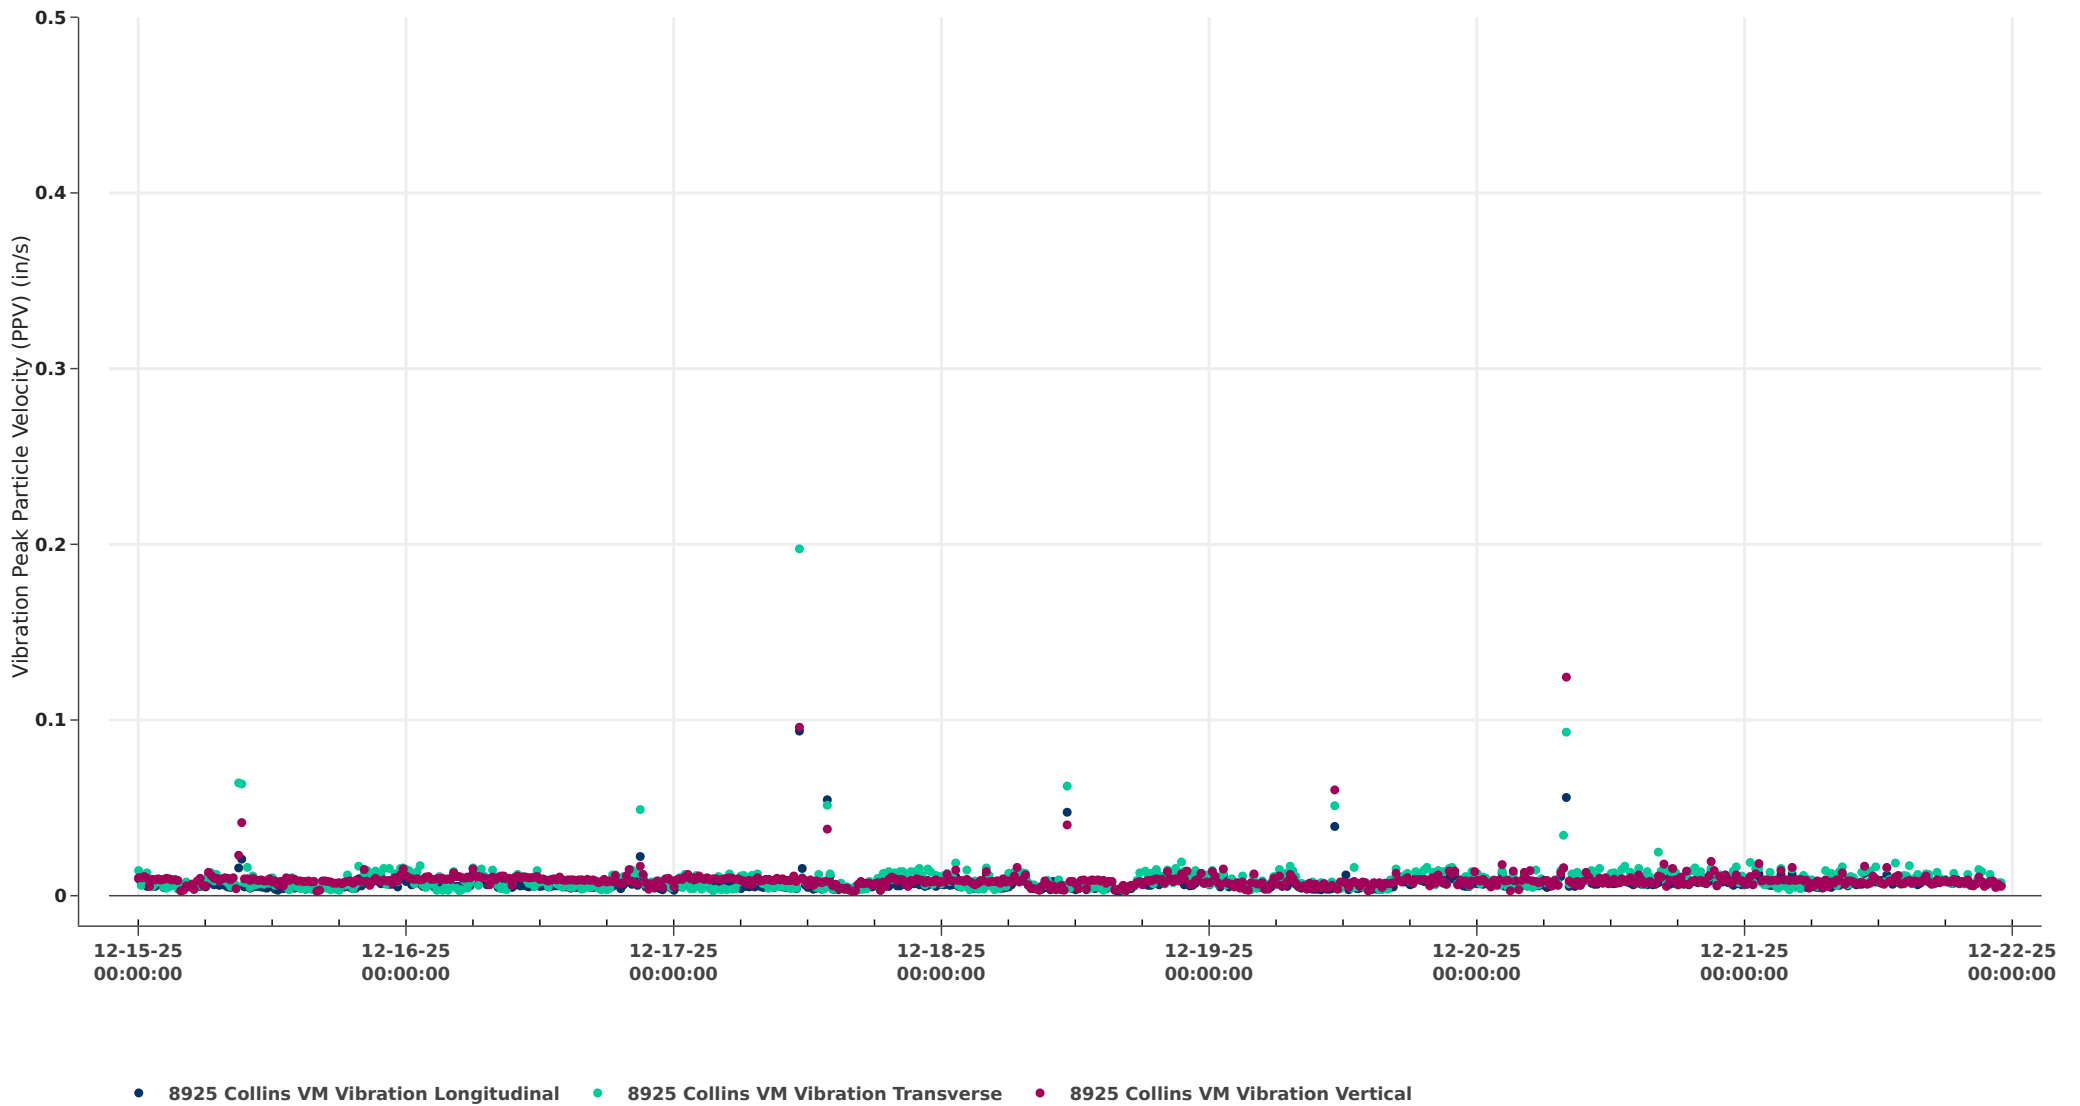

<sup>35</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 10/3/2025.

<sup>36</sup> Battery power of system was expended and required battery replacement. Battery was replaced on 11/19/2025.
